

EDADASULA HARI NAGA SIVANI SAI KISHOR

Unity Game Developer & 3D Artist

+91 7981192088 | saikishor11419821@gmail.com | [Portfolio](#) | [LinkedIn](#) | Andhra Pradesh, India

ABOUT ME

I am a passionate Game Developer and 3D Artist with hands-on experience creating interactive 2D and 3D games using Unity and C#, along with designing 3D assets in Blender. I have experience working on gameplay mechanics, character and vehicle controllers, mission systems, UI, VFX, and game optimization. I am eager to grow my skills and contribute to creating engaging and immersive gaming experiences.

SKILLS

TECHNICAL

- Unity
- C#
- Blender
- 3D Modeling
- 3D Game Development
- Game Design
- Gameplay Programming
- Mobile Game Development
- UI/UX
- Level Design

SOFT

- Communication
- Teamwork
- Problem Solving
- Creativity
- Quick Learning
- Time Management
- Adaptability
- Critical Thinking

GAME PROJECTS

DriveVerse City - Open-World 3D Driving Game

Unity, C#, Blender, WebGL

Live on: <https://kishor111.itch.io/drive> | GitHub: github.com/saikishor11419821/Driveverse-City

- **Environment & 3D Assets:** Created an open-world city environment with buildings, roads, and a restricted area. Also designed a small natural environment with a lake surrounded by mountains.
- **Vehicle & Flight Systems:** Developed car driving, vehicle enter/exit, garage, vehicle purchasing and selling systems, along with helicopter flight mechanics.
- **Missions & Gameplay:** Implemented taxi missions, passenger pickup/drop-off, mini-map GPS navigation, objective arrows, player health, and cash economy systems.
- **UI & Optimization:** Developed game UI systems and optimized gameplay, textures, and assets for smooth performance and WebGL deployment.

Flying Bird – 2D Endless Game

Unity, C#, Blender, WebGL

Live on: <https://kishor111.itch.io/flying-bird> | GitHub: <https://github.com/saikishor11419821/FlyingBird>

- **Gameplay:** Developed a 2D endless game where the player controls a flying bird and avoids different enemies to achieve a high score.
- **Enemy Systems:** Implemented 3 different enemies with unique movement patterns — sliding, jumping, and zig-zag movement.
- **Dynamic Background:** Added changing backgrounds during gameplay to create a more dynamic player experience.
- **Score System:** Implemented a live score display that updates continuously during gameplay.
- **Scene Management:** Created separate Menu Scene and Game Scene for an organized game flow.

Street Cat – 2.5D Endless Runner

Unity, C#, Blender, WebGL

Live on: <https://kishor111.itch.io/street-cat> | GitHub: <https://github.com/saikishor11419821/Street-Cat>

- **Gameplay:** Developed a 2.5D endless running game where the player controls a street cat, avoids obstacles, and collects coins to achieve a high score.
- **Power-Up System:** Implemented multiple power-ups, including Magnet, Shield, and Score Multiplier, to enhance gameplay.
- **Coin & Reward System:** Added coin collection and a reward system that allows players to purchase and unlock new cat skins.
- **Character Customization:** Created a custom shop with multiple cat skins that can be previewed, purchased, and equipped using collected coins.
- **Endless Gameplay:** Implemented an endless running system with continuously generated obstacles and challenges.
- **UI & Game Flow:** Developed gameplay HUD, score and coin displays, power-up indicators, pause/restart functionality, and game-over screens.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML) | Pursuing 2023–2027

BVC College of Engineering, Rajahmundry, Andhra Pradesh **CGPA: 8.72 / 10.0**

Intermediate – MPC 2020–2023

Sahasra Junior College, Kakinada, Andhra Pradesh

Secondary School Certificate (SSC) 2019–2020

Government High School, Yeleswaram, Andhra Pradesh

CERTIFICATIONS Link

- **Game Design Using Unity 3D** - APSDC(June 2026)
- **UNITY - Introduction to Unity Game Development** - Infosys|springboard(June 2025)
- **Blender - Beginners** - Infosys|springboard(June 2026)

HOBBIES & INTERESTS

- Exploring Game Development and 3D Technologies
- 3D Modeling and Environment Designing
- Playing & Analyzing Game Mechanics and Player Experiences
